

March 13, 1974

committee's system is any good anymore anyway. I think we've broken it down completely. I think it's a horrible thing the way it is. I don't think any good is going to come out of a committee because I'm completely disgusted and the whole Legislature with the committee system. The way the bills are coming out of committee, there's not a strong committee system and I don't think we're going to get anything out of committee so I would be against sending it back to committee.

PRESIDENT: Thanks, Senator Clark. Senator Kennedy, do you want to ask him a question? I'd grant you the floor if you do?

SENATOR KENNEDY: Well, I was wondering about time involvement. It would have to be seven days if we publish for a public hearing and I think maybe we can get information. I'm trying to speed this along a little. Maybe we can get information to you people here on the legislative floor. I'll certainly be on the telephone and do everything I can to get you positive statements. All I'm giving you is the facts I've received in the six years experience I've worked at it.

PRESIDENT: All right, Senator Goodrich is next to speak. Then Senator Cavanaugh. The motion before us is the motion is LB1052 be referred to committee for hearing and that's the only issue before us really. Senator Goodrich.

SENATOR GOODRICH: Question for Senator Kennedy if he would yield?

PRESIDENT: Senator Kennedy yield again?

SENATOR KENNEDY: Yes, certainly.

SENATOR GOODRICH: Senator Kennedy, the reason I'm asking. You asked for some questions to be asked so I said okay. Are you familiar with the numbers of the buildings up there, I'm referring to Building 9 is what I'm referring to. Are you familiar with Building 9?

SENATOR KENNEDY: Not exactly. I don't have the map with me but.....

SENATOR GOODRICH: Okay, Building 9 is the north end of the Regional Center up there. It's the one when we went up there and had some hearings, we went up to that north end building up there and had lunch where they had a cafeteria and a kitchen and that sort of things. I wondering why, for example, the move isn't to transfer that building as opposed to the Administration Building instead of, can you give us an idea of why, for example, since we have spent the money on the Administration Building and the kitchen facilities why not give the Veterans Administration the north building or Building Number 9 instead?

SENATOR KENNEDY: I think that is what I thought I tried to explain that the \$274,500 that was spent for the kitchen facilities was to give the service to the veterans and to the Northeast Regional Center. Now, they are more veterans beings on the campus to use that kitchen facility. Now, that kitchen facility is just being completed if you understand their....you know, you were talking about the service that we seen before but this is in...to use both and if you look at the overall plan, this building was in that, all also
